

THE KNIGHT COLLECTION

## KNIGHT LINE

Taking a new approach in the manufacture of sliding doors, The Knight Line Sliding door system utilises the glass to create the strength and stability of there sliding door system leading to an almost frame-less system.

With a vertical sight-lines of only 20mm this system features one of the thinnest sight lines currently available within the industry.

The aim of the Knight Line sliding door is simple, to create the best possible vision between the indoor and outdoor space. The vision sliding door has an exceptionally thin sight-line which is achieved through taking advantage of modern structural glazing.

Multi point locking has been incorporated into the vertical profiles of the door and concealed within the fabric of the building where possible. This has helped to achieve a seamless look whilst still creating an extremely secure door.

Available in a wide range of RAL colours the Vision sliding door can be customised to suit your own style and taste. The door is also available in a wide range of configurations giving endless possibilities.
