

## KNIGHT SLIDE

The Knight sliding glass door system is an affordable sliding door system that is perfect for larger openings thanks to the option of having 3 individual tracks enabling configurations of up to 6 door panels.

With large door panels and a slim mullion our Knight Slide door offers features often found on much more expensive alternatives.

The Knight Slide is constructed from an aluminium profile with a thermal break, when combined with A rated double glazing this provides a thermally efficient large sliding door at a very reasonable price. We can supply a full range of Knight Slide products including windows, doors and roof lights so that you can have other glazing products installed in your home to match your new sliding doors.

As with the majority of our aluminium products Knight Slide sliding patio doors can be manufactured in a wide range of RAL colours to suit your preference. Installing a brand new Knight Slide door will make your room feel more spacious, brighter and warmer. If you are interested in finding out more about these sliding doors come down to our Heswall showroom and try out these doors in person.
